EDUCATION

University of British Columbia Okanagan Sept 2024 - Aug 2026

Bachelor of Science, Computer Science

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Go, SQL

Frameworks & APIs: React, Next.js, Angular, Node.js, Express, FastAPI, REST APIs

Data & Tools: PostgreSQL, Docker, Git, Github Actions, Pytest, Vitest, Playwright

PROFESSIONAL EXPERIENCE

IT & AI Assistant - YMCA of Southern Interior BC Summers 2025 & 2026

- Supported migration of 90+ employee iPhones, including SIM setup, number porting, data transfers, and handover.
- Built Power BI reports from weekly phone records to inform management staffing decisions.
- Contributed to AI-assisted news monitoring for YMCA coverage and relevant external developments.

SOFTWARE PROJECTS

OMR System - Exam Grading Platform May 2026 - Aug 2026

Six-person UBC capstone | Full-stack contributor | Angular, FastAPI, Python, Go/OpenCV, PostgreSQL, Docker, Canvas LMS

- Contributed to authentication, password recovery, account administration, and role-based access.
- Integrated Canvas LMS course/roster imports, grade release, and time-limited student result links.

Every168 - Calendar & Fitness Aug 2026 - Oct 2026

Independent project | Public source | TypeScript, Next.js, React, Express, PostgreSQL, Drizzle ORM

- Built full-stack calendar and fitness features for recurring plans, live workout tracking, and exercise history.
- Implemented account-scoped data, DST-aware scheduling, idempotent writes, and recovery; verified with integration and browser tests.

TradeX - Futures Analysis Platform Aug 2026 - Oct 2026

Independent project | Private source | Node.js, React, TypeScript, Express, PostgreSQL, Docker, AI APIs

- Built a local NQ futures workspace with Live, Replay, and Backtests, using shared minute processing and evidence-checked measurements.
- Integrated an AI market analyst, deterministic opportunity monitoring, and risk tools with automated evidence checks.
